The purpose of the COVID-19 Safety Plan is to help ensure that we actively mitigate the risk of COVID19 in line with the best available health advice.

About COVID-19

COVID-19 is spread from person to person through close contact and droplets including:

- Touching contaminated objects or surfaces (like doorknobs, tables, equipment etc.) and then touching your mouth or face.

As COVID-19 is spread person-to-person through coughing, sneezing, touching

contaminated surfaces, and close contact with infected individuals, there is a need to remain vigilant with cleaning and sanitizing regimes at all times, and to take extra care with maintaining and promoting safe hygiene practices.

The most effective measures are good hygiene practices, additional sanitization regimes, social distancing and keeping away from others if unwell.
